# ENDPOINT DATA PROTECTION MUST HAVES

“Organisations are waking up to the fact that they have important data on endpoint devices that is *not adequately protected, but should be*”

Gartner

## Data Protection Delusions

1 Expecting users to perform manual backups.

2 We've got file sharing, we've got backup.

3 Choosing backup that's just backup.

Backup

## 7 Must Haves

1 Simplified Deployment & Installation

2 Granular Policy Selection & Control

3 Lightning Fast Backups With Huge Data Storage Savings

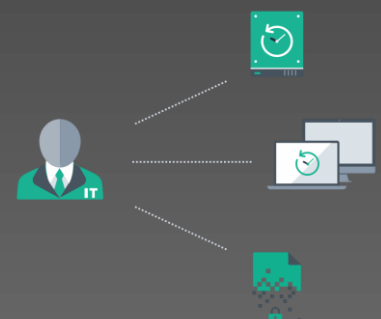

4 Simplified, Secure Data Recovery

5 Complete Data Loss Prevention

6 Central Reporting With Consolidated Metrics

7 Corporate Governance Compliance

“Cibecs intuitive reporting allows for reports based on user activity. You can see whose data has been backed up, how protected your users' data is and pull management reports to prove legal compliance and adherence to good corporate governance.”

Cathy Harris – IT Manager, Clinix Health Group
